ABOUT PROMETHERA[®] BIOSCIENCES (PROMETHERA[®] GROUP)

Promethera[®] Biosciences is a global innovator in liver therapeutics whose mission is to bring patients life-saving treatments to reduce the need for liver transplantation. The Company has developed its cell therapy technologies by using allogeneic stem and progenitor liver cells. Promethera[®]'s lead clinical program, derived from its patented cell technology platform HepaStem™, is designed to benefit from its immune-modulatory and anti-fibrotic properties. The Company has strengthened its development portfolio by developing antibody technologies, such as the anti-TNF-R1 antibody Atrosimab to complement its therapeutics options. Promethera[®]'s team is composed of international experts operating in Belgium, USA, Japan & Switzerland.
